

At MFS Africa, we believe that the only currency that matters is access. Our mission is to make borders matter less by connecting Africans to each other and to the world, giving them access to the global digital economy.

We are Africa's leading omnichannel payments platform, enabling real-time cross-border cross schemes and cross-currency payment within, from and to the continent digitally and offline. We partner with mobile network operators, mobile transfer operators, global enterprises, and financial institutions to connect over 400 million mobile money users to a world of limitless possibilities.

As a fintech company, we strive toward elegance and simplicity in everything we do. Our mission is to make borders matter less, and our values are to simplify, care, and be revolutionary. Our people are talented, curious, and passionate, and the reason our company does exceptional things. Excellence in nurturing our people and their passions is foundational to our success as a business. The MFS Africa team has doubled in the past year and continues to grow rapidly.

Our offices include Abidjan, Accra, Johannesburg, Kampala, Lagos, London, United States, Nairobi, and Port-Louis, and many employees work remotely from locations where we do not have offices.

We pride ourselves on world-class teams and world-class operations. We are regulated by the FSC in Mauritius, BoG in Ghana, BoT in Tanzania, BCC in the DRC, and FCA in the UK, and the CBN in Nigeria.
